

Sage Abra HRMS

PrintBoss for Sage Abra HRMS powered by Wellspring Software

PrintBoss for Sage Abra HRMS powered by Wellspring Software, a Sage Endorsed Solution, makes it easier, faster, and more secure to print all of your accounting documents. It's the ultimate print driver for printing checks and accounting forms.

Printing Checks

When PrintBoss is used to print checks, you can print from any bank account onto the same blank check stock. You can make logos or print a company name on the check based on the bank account from which the check is drawn. And you can print one or more signatures based on the amount of the check.

For fraud prevention, PrintBoss can create a Positive Pay file that can be sent to your bank after each check run or at the end of the day, to ensure that no check is cashed on your account except those that you have actually written.

PrintBoss Highlights

- Print all checks onto the same blank check stock
- Print signatures based on the amount of the check
- Create a Positive Pay file to prevent check fraud
- Print document copies from different trays
- Print document copies to different printers
- Print document copies as a fax or an email
- Create an archival PDF file for each document

Compatibility

PrintBoss Standard Edition is compatible with Sage Abra SQL Payroll v8.4 and up.
